PROFESSIONAL OVERVIEW

Experienced Full Stack Developer with 6+ years in developing web and mobile applications using Laravel, Flutter, Kotlin, and React. Skilled in building scalable architectures, integrating cloud solutions (Firebase), and third-party APIs. Successfully led multiple development teams on complex e-commerce, delivery, and government projects. Actively participated in competitive programming (ICPC) and international tech events (GITEX).

WORK EXPERIENCE

Full Stack Developer – Digital Innovation Technology

Abu Dhabi, UAE | March 2024- Present | <https://digitalinnovation.ae>

- Developed and launched 6+ integrated digital solutions within the company's portfolio.
- Enhanced ad campaign efficiency, resulting in a 20% increase in user engagement.
- Led a hybrid team to successfully achieve project goals.
- Integrated payment systems, Google Maps, Firebase, Hostinger, and other third-party services.
- Represented the company as the lead developer at GITEX 2024.

Mobile App Developer / Full Stack Developer – Move X Delivery

Abu Dhabi, UAE | September 2022- March 2024 | <https://movex.ae>

- Built a comprehensive delivery application supporting four distinct user roles using Flutter and Laravel.
- Designed over 50 custom UI screens and integrated 20+ external libraries.
- Optimized order tracking, reducing average delivery time by 15%.
- Contributed to optimization, automation, and continuous updates across the platform.

Mobile App Developer – Swan Technology

Homs, Syria | April 2019- September 2022

- Delivered mobile applications adopted by 3 government sectors, improving citizen services by 25%.
- Designed responsive user interfaces and followed clean architecture principles.
- Integrated Google Maps and RESTful APIs to enhance app functionality.

Android Developer Intern – TogTog (International Internship)

Bangkok, Thailand | June 2022 – September 2022

- Collaborated with international teams to develop and deploy Android applications, gaining cross-cultural teamwork experience.
